

APTEAN ROSS MOBILE

DATA SHEET

SEEING YOUR BUSINESS ANYWHERE

How often do you receive timely updates from your ERP solution? If you need immediate information while you're on the go, do you have to call around hoping to find the right person? And what if that person's not readily available; do you have time to wait?

What if you could get constant on-the-go connectivity to your ERP solution? What if you had instant visibility to everything from inventory to transactional data? With Aptean's Ross Mobile you can connect to Ross ERP anywhere, anytime, giving your users immediate access to the information they need.

BENEFITS

Extending production data access to a mobile environment means more than just making raw operational data available on a mobile device. It means presenting data in a clear, clean, and easily digestible way.

Using simple dashboards, Ross Mobile provides a consistent user experience, extending your supply chain operations to mobile devices. You can explore inventory data including available inventory balances, lot information and characteristics, and projected inventory balances. Ross Mobile enables access to customer information including contact list, AR aging summary, AR inquiries, sales order inquiries and price/promotion inquiries.

Ross Mobile is:

- **Targeted:** Visibility to specific ERP data, for example sales data for field sales personnel
- **User-friendly:** Minimal training needed for those accustomed to iPhone or Android interfaces
- **Complete:** 360-degree of your entire operations anytime, anywhere

Having the capability to see your business anywhere enables you to act faster and smarter, to improve overall productivity, and to stay ahead of the competition.

FAST ACTING VISIBILITY

Immediate access to targeted sales data enables field sales personnel to confirm on-time order shipments and proactively take the appropriate action should a shorted or partially filled order be identified. Ross Mobile gives sales personnel the ability to enter a sales order, generate additional sales when walking customer aisles by providing insight to available inventory lot information, and forward inventory availability by data. Additionally, your sales person can make "hot " order or replenishment order recommendations to their customer in the event they encounter low inventory levels or soon-to-be expired inventory on their shelves.

MINIMAL TRAINING NEEDED

With its familiar and modern user interface, Ross Mobile requires minimal training and is designed for iPhone and Android interfaces. Ross Mobile delivers a consistent look and feel regardless of what OS you use, offering flexibility to an enterprise that supports multiple device options or a bring-your-own-device (BYOD) policy, and to users that go between different device types.

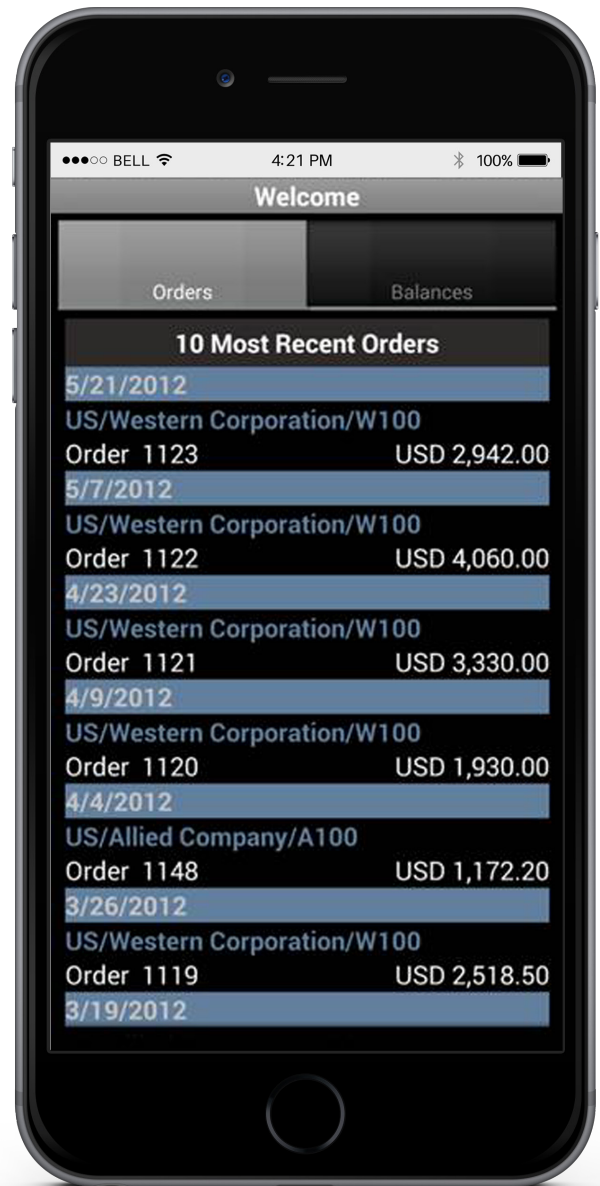

360-DEGREE VIEW

Ross Mobile provides you a 360-degree view of production processes and operations. It consolidates work center, sales, labor and inventory transactions in one convenient place. The application's comprehensive trace model enables you to track and trace in seconds. Having a complete view of your supply chain increases confidence in process manufacturers and their customers.

SUMMARY

Aptean's Ross Mobile ERP puts enterprise detail in your hands, in your pocket and with you on the road. Equip your sales personnel for success by making it simple to provide on-the-spot pricing quotes. Extend the ROI you've realized from your original Ross ERP implementation in a cost-effective manner. Most importantly with Ross Mobile, stay connected, anywhere and anytime.
